RESTAURANT POS SOFTWARE

FEATURES & PRICING

A practical sales package for independent restaurants

INDIA ? INR

Recommended offer

LAUNCH ? PER BRANCH	STANDARD ? PER BRANCH	ONE-TIME SERVICES
?999 / month	**?1,499 / month**	**?3,000??5,000**
?9,999 / year Introductory pricing	?14,999 / year For a mature, supported product	Setup, menu entry & staff training

Additional branch: ?299??499/month. Suggested launch: start with a small pilot group at ?999/month; move new customers to ?1,499/month when onboarding, uptime, backups, and support are dependable.

Prices above are recommendations, not a formal valuation. Quote in INR and state tax, hardware, support, backup, and branch limits explicitly.

What the current project includes

CAPABILITY	CURRENT SCOPE
Restaurant operations	Owner and Branch Manager roles; organization and branch management; branch menu with nested categories; vegetarian menu support.
POS & billing	Cart, cash/UPI payment recording, customer name and mobile required, order totals, bill and kitchen ticket printing through browser-connected printers.
Customer records	Customer lookup by mobile, new/returning/regular indicator, visit count, average order value, last visit, and a suggested discount for regular customers.
Discount controls	Owner-entered product cost prices limit discounts; the server rejects discounts that would put an item below its saved cost.
Payments	Owner-configured UPI ID and payer name; INR exact-total UPI QR on the bill. If not configured, manager confirms to continue without a QR. A QR requests payment; it does not verify settlement.
Reporting	Owner sales summaries, branch comparisons, recent orders, and paginated order history.

Features to add before selling the expanded plan

Do not advertise these as available until built, tested, and included in your support workflow.

PROPOSED ADD-ON	FEATURE SCOPE
Loyalty	Points or rewards, redemption rules, customer offers, and safeguards against misuse (beyond the customer history already implemented).
Token management	Order queue, token display, status updates, and reliable token sequencing for busy service.

PROPOSED ADD-ON	FEATURE SCOPE
QR ordering	Customer-facing menu and order flow; define payment, kitchen routing, and whether staff approval is required.
Kitchen Display System	Live kitchen order screen, prep/status workflow, and recovery behavior if connectivity drops.

Package positioning

PLAN	SUGGESTED PRICE	POSITIONING
Launch	?999/month or ?9,999/year	For the current product after a limited pilot. Annual payment is discounted versus monthly billing.
Standard	?1,499/month or ?14,999/year	After the added features are production-ready and support/operations are proven.
Onboarding	?3,000??5,000 once	Setup, menu entry, staff training. Scope separately if data migration is large.
Extra branch	?299??499/month	Price according to branch-specific support, storage, and hardware needs.

Petpooja reference (public website)

LISTED OFFER	PUBLISHED FIGURE	NOTES
Base Plan	?12,000; page labels price ex tax	Listed capabilities include cloud billing, menu management, inventory, reporting, aggregator integrations, and unlimited users/terminals. Confirm billing term and current local quote.
Marketing Manager ? Core	?10,000 ex tax	Pricing-page figure; billing period should be confirmed directly. CRM + Loyalty is listed in the plan comparison.
Operations Manager ? Growth	?20,000 ex tax	Pricing-page figure; billing period should be confirmed directly. Operations features include token management, QR ordering, and kitchen display in the comparison.

?42,000 combined is only an illustration if all three figures use the same billing period. It is not a verified annual bundle quote.

Positioning summary

- Your current project is a focused, lower-cost POS and operations tool?not yet a full substitute for a mature platform with inventory, purchase management, aggregator integrations, broad reporting, and established support.
- At ?999/month, price against the features you can reliably deliver today. Use ?1,499/month as a target only after loyalty, tokens, QR ordering, and kitchen display are complete and supported.
- Exclude hardware and custom integrations unless priced separately. Publish uptime/backup policies, support hours, data export/ownership, and whether GST is extra.
